10-DAY PERFORMANCE AUDIT

Personal Discipline, Deep Work, Physical Training & Recovery

A ten-day accountability log: one page per day, three to five minutes, evidence over emotion.

1 IDENTIFICATION

NAME OR CALLSIGN	START DATE	END DATE (DAY 10)

2 MISSION

Specific and observable — what will be different after 10 days?

PRIMARY OBJECTIVE FOR THESE 10 DAYS

MOST IMPORTANT AREA I WANT TO IMPROVE

3 TARGETS

Every daily YES / NO is judged against these. Set them realistically.

DAILY FOCUSED-WORK TARGET	RUNNING TARGET	TARGET BEDTIME	TARGET WAKE-UP TIME
net min / day	_____ km per run _____ km in 10 days	hh:mm	hh:mm

PLANNED TIME WINDOW FOR BEDTIME AND WAKE-UP HABITS	PLANNED RUNNING DAYS (REST DAYS ARE SCHEDULED ON PAGE 2)
± min	of 10 days

4 BEHAVIOUR

Name a concrete action, not a personality trait.

ONE BEHAVIOUR I MUST ELIMINATE	ONE BEHAVIOUR I MUST STRENGTHEN

5 STANDING ORDERS

Read once before Day 1. These rules apply to every page.

Record reality, not intention. Do not manipulate the numbers to make yourself look disciplined. An honest failure is more useful than a false success.

N/R
NOT RECORDED

Missing data is marked N/R. If you did not record a value, write N/R in the field. N/R is neither a success nor a failure: leave it out of every total, count and average, and state how many recorded days each figure is based on (n). A genuine zero — 0 km on a rest day, 0 minutes of scrolling — is a recorded value: write 0, not N/R.

- **When to record.** Morning, about 1 minute: Section A, the primary priority and planned focused minutes. Evening, about 3 minutes: Sections B–G. Next morning: actual bedtime and habit 7.
- **Late entries.** If a page is completed the next day, write LATE beside the date. Do not reconstruct details you cannot remember — use N/R.
- **Corrections.** Strike through once and write the true value beside it. Never overwrite an entry to improve a result.
- **Evidence.** Tick M when a value comes from a device, app or timer and E when it is your estimate. Ratings are self-reports, not measurements.

6 COMMITMENT

I WILL RECORD WHAT ACTUALLY HAPPENS FOR 10 CONSECUTIVE DAYS — SIGNATURE	DATE

Marking Key, Definitions & 10-Day Plan

Every metric means the same thing on every day. When in doubt, use the definition below.

1 DAILY ROUTINE

Target: 3–5 minutes per day in total.

MORNING · ~1 MIN	DURING THE DAY	EVENING · ~3 MIN	NEXT MORNING
Section A, primary priority (D) and planned focused minutes (B).	Log each work session in B when it ends: times, net minutes, distraction tally.	Complete C, D, E, F and G. Prepare tomorrow's primary priority.	Actual bedtime (A) and habit 7 (went to bed within window).

2 MARKING KEY

Use exactly these marks so the 10-day counts stay comparable.

☐ **DONE**	Completed fully, as planned or defined.	☐ **PARTIAL**	Started or partly done, but not to the full plan.
☐ **MISSED**	Planned and not done.	**N/R**	Not recorded: missing data, left out of all counts and averages.
N/A	Did not apply today (e.g. no work planned); left out of that count.	**M / E**	Measured (device, app, timer) or Estimated (your best judgement).
1 – 5	Circle one. 1 = very low, 5 = very high. Stress: 5 = most stressed.	☐ **YES / NO**	Tick one. YES only when the stated condition is fully met.

3 METRIC DEFINITIONS

Anything that could be interpreted two ways is defined here.

Focused minutes (net)	Genuine, intentional work on the stated task. Subtract breaks, unrelated browsing, scrolling, messaging and idle desk time. A 60-minute block with 15 minutes of drift = 45 focused minutes. Time at a desk is not focused time.
Work session	One block of work on one task, from start to stop. Record its net focused minutes, not its clock length.
Session quality 1–5	Depth of attention: 1 = constantly broken, 3 = mixed, 5 = deep and uninterrupted.
Distraction	Any unplanned switch of attention away from the task (phone, browsing, chat). Tally each one in the session row.
Significant interruption	An interruption that broke focus for about 5 minutes or more, or ended a session.
Primary priority	The single task that would make the day a success, written before work starts. DONE only if completed to the standard you set; PARTIAL if meaningfully advanced but not finished.
Focus target achieved	YES only if total net focused minutes ≥ the planned focused minutes for that day.
Running completed	A run actually performed, of any distance. Distance and pace from a watch or app = M; otherwise E.
Perceived effort (RPE)	How hard the session felt, 1–10: 1 = very easy, 5 = steady, 7 = hard, 10 = maximal.
Planned rest / recovery choice / unplanned miss	Planned rest: REST written in the 10-day plan below before the day began. Recovery choice: training reduced or skipped because of pain, illness or unusual fatigue — a sound decision, not a failure. Unplanned miss: training was planned, no health reason, not done.
Recreational screen time	Phone, TV, gaming or computer use for entertainment or social media. Excludes work and study.
Unplanned scrolling	Scrolling you did not intend to do. It is part of recreational screen time, not additional to it.
Time lost to avoidable activities	Minutes spent on things you would not choose on reflection that displaced planned work, training or rest.
Sleep duration	Time actually asleep the previous night, not time in bed. Write decimal hours in F (7 h 30 min = 7.5 h).
Within planned window	Within ± the time window set on page 1 of your target bedtime or wake-up time.
Daily self-assessment 1–10	A subjective judgement of the day. It never replaces the recorded evidence and is not used to prove performance.

4 10-DAY PLAN — COMPLETE BEFORE DAY 1

Rest decided here in advance counts as PLANNED REST.

DAY	01	02	03	04	05	06	07	08	09	10
DATE										
PLANNED TRAINING RUN / OTHER / REST										
PLANNED RUN DISTANCE km										
PLANNED FOCUSED WORK net min										
KNOWN CONSTRAINTS exam, travel, shift…										

Changing the plan mid-way is allowed: strike through, write the new plan and the reason, and never erase. A rest day added after the day has started is a RECOVERY CHOICE (if for health) or an UNPLANNED MISS — not a planned rest.

DAY **01** OF 10

A DAILY IDENTIFICATION

Morning: date, sleep, wake-up, planned bedtime. Next morning: actual bedtime.

DATE	DAY OF THE WEEK — CIRCLE ONE	ACTUAL WAKE-UP TIME
	MON TUE WED THU FRI SAT SUN	hh:mm

PREVIOUS NIGHT'S SLEEP DURATION	PLANNED BEDTIME (TONIGHT)	ACTUAL BEDTIME — FILL NEXT MORNING
h min ☐ M ☐ E	hh:mm	hh:mm

B FOCUSED WORK & STUDY

Focused minutes = NET minutes of genuine, intentional work. Exclude breaks, unrelated browsing, scrolling and idle desk time.

WORK SESSION	SUBJECT / TASK	START hh:mm	END hh:mm	FOCUSED MIN (NET)	QUALITY 1–5	DISTRACTIONS COUNT
1						
2						
3						
4						
5						

TOTAL FOCUSED	TOTAL FOCUSED
min	h
PLANNED FOCUSED	MOST PRODUCTIVE #
min	session

FOCUS TARGET ACHIEVED? (TOTAL ≥ PLANNED) ☐ YES ☐ NO

MAIN DISTRACTION

ONE TASK COMPLETED THAT MATERIALLY ADVANCED MY GOALS

C PHYSICAL TRAINING & RUNNING

Never train through pain, illness or excessive fatigue. Choosing recovery is not a discipline failure.

RUNNING COMPLETED?	RUNNING DISTANCE	RUNNING DURATION	AVERAGE PACE, IF KNOWN	PERCEIVED EFFORT (RPE) 1 = VERY EASY · 10 = MAXIMAL
☐ YES ☐ NO	☐ M ☐ E km	min	min/km	(1) (2) (3) (4) (5) (6) (7) (8) (9) (10)

OTHER PHYSICAL ACTIVITY — TYPE	DURATION, APPROX.	MOBILITY / STRETCHING?	UNUSUAL FATIGUE, PAIN OR DISCOMFORT
	min	☐ YES ☐ NO	☐ NONE ☐ YES → NOTE:

REST OR RECOVERY DAY?	IF NO PLANNED TRAINING WAS DONE TODAY, IT WAS — TICK ONE
☐ YES ☐ NO	☐ PLANNED REST (in 10-day plan) ☐ RECOVERY CHOICE (pain / illness / fatigue) ☐ UNPLANNED MISS (planned, not done)

D DAILY DISCIPLINE & HABITS

Tick one per row: DONE · PARTIAL · MISSED. Not recorded → write N/R. Habits are not equally important.

PRIMARY PRIORITY — THE ONE TASK THAT MAKES TODAY A SUCCESS (WRITE IT BEFORE STARTING WORK)	COMPLETED MY PRIMARY PRIORITY?
	☐ DONE ☐ PARTIAL ☐ MISSED

	SUPPORTING HABITS	DONE	PARTIAL	MISSED
1	Woke up within my planned time window.	☐	☐	☐
2	Began my first important task without unnecessary delay.	☐	☐	☐
3	Followed my planned study/work schedule.	☐	☐	☐
4	Avoided unnecessary social media or entertainment during work.	☐	☐	☐
5	Followed my planned physical activity or recovery schedule.	☐	☐	☐
6	Prepared the next day's priorities.	☐	☐	☐
7	Went to bed within my planned time window.	☐	☐	☐

Bedtime habit (7): tick it next morning. If a habit did not apply today, write N/A and exclude it from the 10-day count.

E TIME & DIGITAL DISTRACTION AUDIT

Values are ESTIMATES unless read from device statistics — tick M (measured) or E (estimated).

RECREATIONAL SCREEN TIME	UNPLANNED SCROLLING	SIGNIFICANT INTERRUPTIONS	TIME LOST TO AVOIDABLE ACTIVITIES
☐ M ☐ E min	☐ M ☐ E min	count	☐ M ☐ E min

BIGGEST SOURCE OF WASTED TIME	ONE SPECIFIC ACTION TO REDUCE THIS WASTE TOMORROW

F ENERGY, MOOD & RECOVERY

Circle 1–5: 1 = very low, 5 = very high (stress: 5 = most stressed). A tracking tool, not a medical assessment.

MORNING ENERGY	CONCENTRATION QUALITY	MOOD	PHYSICAL FRESHNESS	STRESS LEVEL (5 = HIGH)	SLEEP QUALITY
(1) (2) (3) (4) (5)	(1) (2) (3) (4) (5)	(1) (2) (3) (4) (5)	(1) (2) (3) (4) (5)	(1) (2) (3) (4) (5)	(1) (2) (3) (4) (5)

SLEEP DURATION	WATER, APPROX.	MEALS REASONABLY CONSISTENT WITH MY NEEDS?	ANY FACTOR AFFECTING TODAY'S PERFORMANCE
h	litres	☐ YES ☐ NO	

G DAILY SELF-REVIEW

Short, factual answers. The self-assessment is subjective — justify it with evidence from this page.

1 What was my biggest meaningful achievement today?

2 Where did I waste the most time or break discipline?

3 What was the main reason for any missed target?

4 What did I learn about my own behaviour today?

5 What is the single most important correction for tomorrow?

DAILY SELF-ASSESSMENT (1–10) — SUBJECTIVE	WAS THIS SCORE BASED ON EVIDENCE?	SIGNATURE / PERSONAL ACCOUNTABILITY MARK
(1) (2) (3) (4) (5) (6) (7) (8) (9) (10)	☐ YES ☐ NO	

ONE SENTENCE EXPLAINING THE SCORE

(1) (2) (3) (4) (5) (6) (7) (8) (9) (10)	☐ YES ☐ NO	

ONE SENTENCE EXPLAINING THE SCORE

10-Day Trend & Summary

Copy each value exactly as recorded. Where a daily page says N/R, write N/R here — never 0.

1 DAILY RECORD

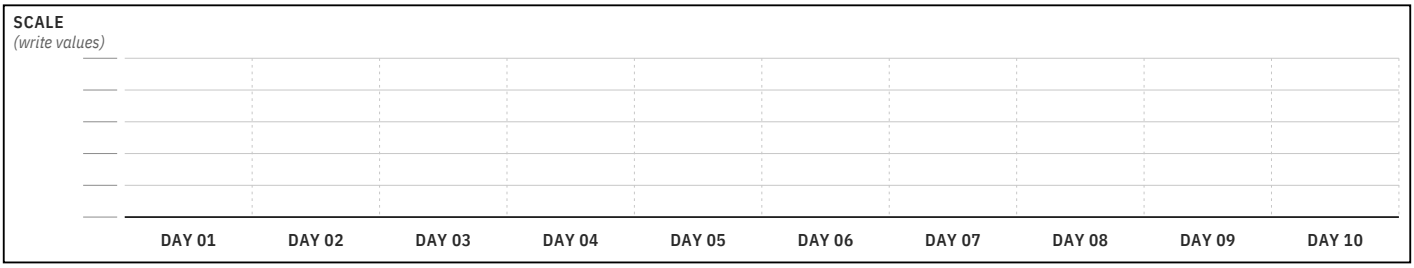

One row per day. Mark estimated values with E.

DAY	DATE	FOCUSED WORK net min	FOCUS TARGET MET YES / NO	RUNNING DISTANCE km	SLEEP DURATION h	MORNING ENERGY 1–5	SCREEN DISTRACTION min (E)	PRIMARY PRIORITY DONE/PART/MISS	DAILY SELF-RATING 1–10
01									
02									
03									
04									
05									
06									
07									
08									
09									
10									
n	days recorded								

Screen distraction = recreational screen time from Section E (unplanned scrolling is part of it). Bottom row: write n, the number of days with a recorded value in each column.

2 TREND PLOT — FOCUSED MINUTES

Bar = focused minutes. Draw your target as a line. Mark N/R days with × (not a zero bar).

3 10-DAY TOTALS & AVERAGES

Use recorded values only. Every result must show its n.

MEASURE	RESULT	BASED ON	CALCULATION RULE
Total focused-work minutes	min	n =	Sum of the recorded daily totals. N/R days are left out, never counted as 0.
Total focused-work hours	h	n =	Total focused minutes ÷ 60, rounded to 0.1 h.
Average focused minutes per day	min / day	n =	Total focused minutes ÷ n (days with a recorded total).
Total running distance	km	n =	Sum of recorded distances. A rest day recorded as 0 km counts as 0; N/R is left out.
Number of running days	days	of n =	Count of days marked Running completed = YES.
Average sleep duration	h / night	n =	Sum of recorded sleep hours ÷ n, rounded to 0.1 h.
Days primary priority completed	DONE __ PART __	of n =	Count DONE as completed. Report PARTIAL separately — never merge them.
Days focused-work target achieved	days	of n =	Count of YES. N/R and N/A days are left out of n.

Calculation rules. 1 · N/R is missing data: never 0, never a success, never a failure. 2 · Write n beside every count and average, e.g. “212 min/day (n = 8)”. 3 · A genuine 0 is data — include it. 4 · Round only at the end and never beyond what was recorded (whole minutes; 0.1 h; 0.1 km). 5 · If most values behind a figure are estimates (E), label the figure “estimated”.

Consistency Analysis

Base every answer on recorded entries. Count behaviour and frequency — do not judge character.

1 HABIT TALLY — FROM SECTION D OF EACH DAY

Count each mark across the 10 pages. The primary priority is scored separately.

#	BEHAVIOUR	DONE	PARTIAL	MISSED	N/R · N/A	RECORDED n = D + P + M	COMPLETION DONE of n
P	**Completed my primary priority**						
1	Woke up within my planned time window						
2	Began my first important task without unnecessary delay						
3	Followed my planned study/work schedule						
4	Avoided unnecessary social media or entertainment during work						
5	Followed my planned physical activity or recovery schedule						
6	Prepared the next day's priorities						
7	Went to bed within my planned time window						

Completion is written as a count, e.g. "6 of 9", not a percentage — ten days are too few for precise rates. N/R and N/A are excluded from n.

2 KEY COUNTS

Copy from the 10-day summary.

DAYS I ACHIEVED MY FOCUS TARGET	DAYS I COMPLETED MY PRIMARY PRIORITY	LONGEST STREAK OF MEETING MY FOCUS TARGET
days, of n = ____	DONE ____ PARTIAL ____ of n = ____	consecutive days · Days ___ to ___

Streak = consecutive days marked YES. An N/R day ends a verified streak — note it, e.g. "4 days (N/R on Day 6)".

3 FIRST HALF VS SECOND HALF

Shows direction of change. Report n for each average.

PERIOD	AVG FOCUSED min / day (n)	FOCUS TARGET days met (of n)	PRIORITY DONE (of n)	AVG SLEEP h (n)	RUNNING days	AVG SELF-RATING 1–10 (n)
Days 01–05						
Days 06–10						
Change (2nd – 1st)						

4 FINDINGS

Best / worst day: judge by primary priority status first, then focused minutes against plan.

BEST DAY — DAY ___ · EVIDENCE	WORST-PERFORMING DAY — DAY ___ · EVIDENCE
MOST CONSISTENT BEHAVIOUR (HIGHEST DONE COUNT)	MOST FREQUENTLY MISSED HABIT (HIGHEST MISSED COUNT)
BIGGEST IMPROVEMENT DURING THE 10 DAYS	BIGGEST RECURRING WEAKNESS (SEEN ON 3 OR MORE DAYS)

Time & Productivity Analysis

Ten days of data reveal patterns worth testing — not proof of what caused them.

1 INTENTION VS REALITY

Compare only days on which both planned and actual minutes were recorded.

PLANNED FOCUSED MINUTES, TOTAL	ACTUAL FOCUSED MINUTES, TOTAL	DIFFERENCE (ACTUAL – PLANNED)	DAYS ACTUAL ≥ PLANNED
min · n = ____	min · n = ____	min	of n = ____

1 · DID MY ACTUAL FOCUSED TIME MATCH MY INTENTIONS? WHAT DOES THE GAP SHOW?

2 BEST VS WORST DAYS — MANUAL COMPARISON

Observations, not causes: three days against three cannot prove anything.

GROUP	DAY #	FOCUSED TIME min	SLEEP h	ENERGY 1–5	DISTRACTIONS screen min	EXERCISE km / min / rest	PRIMARY TASK DONE / PART / MISS
Best day 1							
Best day 2							
Best day 3							
Best — average							
Worst day 1							
Worst day 2							
Worst day 3							
Worst — average							

HOW I RANKED BEST AND WORST DAYS (CRITERIA USED)

WHAT DIFFERS MOST BETWEEN THE TWO GROUPS? (AN OBSERVATION TO TEST, NOT A CAUSE)

3 INVESTIGATION

Answer from the record. Write the days or counts that support each answer.

2 · WHICH DAYS GENERATED THE MOST MEANINGFUL WORK? (DAYS · TASKS THAT MATERIALLY ADVANCED MY GOALS)

3 · WAS PRODUCTIVITY AFFECTED BY SLEEP, DISTRACTIONS, WORKLOAD OR OTHER FACTORS? TICK WHAT APPEARED ALONGSIDE WEAKER DAYS:

☐ SHORT SLEEP ☐ HIGH DISTRACTION ☐ HEAVY WORKLOAD ☐ LOW ENERGY / MOOD ☐ NO EXERCISE ☐ ILLNESS / PAIN ☐ OTHER: _____

What I observed (association only):

4 · WHICH ACTIVITIES REPEATEDLY CONSUMED TIME WITHOUT PRODUCING USEFUL OUTCOMES? (ACTIVITY · DAYS SEEN · APPROX. MIN)

5 · WAS I CONFUSING BEING BUSY WITH MAKING PROGRESS?

☐ YES ☐ PARTLY ☐ NO Evidence: focused hours _____ vs days with a task that materially advanced my goals _____ of n = ____

Physical Performance Analysis

Training load is judged against recovery and symptoms. More distance is not automatically better.

1 10-DAY TRAINING STRIP — FROM SECTION C

REST = planned rest · REC = recovery choice · MISS = unplanned miss

	DAY 01	DAY 02	DAY 03	DAY 04	DAY 05	DAY 06	DAY 07	DAY 08	DAY 09	DAY 10
PLANNED (10-DAY PLAN) RUN / OTHER / REST										
ACTUAL RUN / OTHER / REST / REC / MISS										
RUNNING DISTANCE km										
RUNNING DURATION min										
PERCEIVED EFFORT RPE 1–10										
MOBILITY / STRETCHING YES / NO										
FATIGUE, PAIN OR DISCOMFORT YES / NO										
SLEEP DURATION h										

2 TOTALS

Recorded values only — write n where asked.

TOTAL RUNNING VOLUME	NUMBER OF RUNNING DAYS	PLANNED REST DAYS TAKEN	RECOVERY CHOICES	UNPLANNED MISSES	DAYS WITH FATIGUE / PAIN
km · n = ___	days	days	days	days	days

3 OBSERVATIONS

Compare effort at similar distance or pace before calling a trend.

PERCEIVED EXERTION TREND

☐ **RISING** ☐ **STABLE** ☐ **FALLING** ☐ **TOO LITTLE DATA** *Evidence:*

RECOVERY CONSISTENCY — PLANNED REST TAKEN AS PLANNED? MOBILITY ON ___ OF n = ___ DAYS

SLEEP AND FATIGUE OBSERVATIONS

WHAT I SHOULD CONTINUE	WHAT I SHOULD ADJUST

4 NEXT TRAINING BLOCK — DECISION GATE

The next plan follows recovery, symptoms and tolerance — not ambition.

Consider any increase in running volume only if every statement below is true:

- ☐ No pain, injury or illness flags during the 10 days.
- ☐ Perceived effort was stable or falling at a similar distance or pace.
- ☐ Sleep was adequate on most recorded nights.
- ☐ Planned rest days were actually taken.
- ☐ I finished most sessions feeling I could have done a little more.

DECISION FOR THE NEXT 10 DAYS: ☐ **REDUCE** ☐ **MAINTAIN** ☐ **INCREASE MODESTLY**

Sharp or persistent pain, chest pain, dizziness, illness or unusual fatigue: stop training and seek qualified medical advice.

Personal Pattern Detection

Describe what the record shows: behaviour, frequency and context.

Write findings as evidence, not labels. "On 4 of 9 recorded days I started work after 10:00" — not "I am lazy". Isolated failures say nothing about character. Something seen on one or two days is a note; a pattern needs repetition.

1 PATTERNS

Right-hand column: the days or count that support each answer.

QUESTION · ANSWER	EVIDENCE — DAYS / COUNT
1 My three most productive conditions (time, place, state, preparation) 1. 2. 3.	
2 My three biggest recurring distractions 1. 2. 3.	
3 The behaviour that creates the most damage to my schedule	
4 The excuse I use most often	
5 The difference between what I planned and what I repeatedly did *Planned:* *Repeatedly did:*	
6 One environmental change that would make good behaviour easier	
7 One unnecessary activity I should reduce	
8 One productive behaviour I should make easier to repeat	

The Next 10-Day Action Plan

Few, measurable commitments beat many vague ones. Every line must be checkable on a daily page.

1 COMMITMENTS

Fill every column. If you cannot say how you will verify it, rewrite it.

Example — Action: two 50-minute study blocks before noon · Measure: net focused minutes · Target: ≥ 100 min on 8 of 10 days · When: 08:00–12:00 · Verify: Section B totals.

COMMITMENT	ACTION	MEASURE	TARGET	WHEN	HOW I WILL VERIFY IT
Priority 1					
Priority 2					
Priority 3					
Focused-work target (measurable)					
Physical-training commitment (realistic)					
Sleep or recovery improvement					
Distraction-reduction rule					
Habit to stop					
Habit to strengthen					
Fallback plan for difficult days					

2 FALLBACK & KEY MEASUREMENT

A bad day still has a minimum standard.

A DIFFICULT DAY MEANS (TRIGGER)	MINIMUM I WILL STILL DO ON A DIFFICULT DAY
	Focused work _____ min · Movement or rest _____ · In bed by _____

THE SINGLE MOST IMPORTANT MEASUREMENT I WILL TRACK	TARGET	RECORDED DAILY IN SECTION

DECLARATION

“I will judge the next 10 days by what I consistently do, not by what I promise myself.”
